

MARCUS R. PEREIRA, MD, MPH, FAST

Marcus R. Pereira, MD, MPH, FAST, is a Professor of Medicine at CUIMC and the Director of Clinical Services in the Division of Infectious Diseases. In addition, he is the Medical Director of the Transplant Infectious Diseases Program, where he oversees the development of infection prophylaxis and treatment protocols for immunocompromised patients. His areas of interest include the management of multidrug-resistant bacterial and fungal infections, as well as drug-resistant CMV infections, and more recently, the impact of COVID-19 in transplant recipients. He has also collaborated in important multicenter studies as well as the 2025 International CMV Guidelines, sponsored by the Transplantation Society. Dr. Pereira is an active member of national societies such as the American Society of Transplantation and the Infectious Diseases Society of America, and is an Associate Editor for the *American Journal of Transplantation*.
